

Once you've found the perfect Plastic Fantastic piece, you'll want to keep it in the best condition so it will last you for years to come. This user manual will help you keep it looking as good as new.

## MAINTENANCE & CARE

### OUTDOOR USE

It's strongly advised to store your Plastic Fantastic furniture indoors during extreme weather conditions and winter period. Keep the furniture clean at all times. Remove any algae, dirt residue and other biological and acidic residue such as bird droppings as soon as possible.

### CLEANING

Clean the furniture with a soft sponge or cloth, warm water and mild detergent regularly. Do not use any harsh or chemical based cleaning products as this might damage the material and/or change its color. To remove deeper stains from PU rubber we offer a special cleaning set for this purpose.

### PLASTIC FANTASTIC DRESSOIR DRAWERS

Due to the nature of the material, the drawers can become less smooth over time. To improve sliding of the drawers, each side has been treated with special grease. Inside the top-drawer is a little envelope with an extra container containing this grease. Please use this to improve sliding of the drawers when necessary.

## MINOR DAMAGE TO YOUR PLASTIC FANTASTIC PIECE?

Trouble shooting minor damage caused by active use like scratches, dents or rips is below in three simple steps. For more severe damage contact JSPR to find out your possibilities and come up with a solution.

## REPAIR KIT

In case of minor damage to the Plastic Fantastic series furniture it's possible to fix the affected area at home by ordering a JSPR repair kit in the exact same colour as your furniture. The repair kit consists of two containers; a hardener (usually in translucent white) and coloured liquid rubber in colour of choice.

Determine the size of the damaged area because it's possible to only mix as much as you need leaving the rest as a back-up incase new damage occurs. Keep the remaining material stored in room temperature in a dark place and keep out of reach of children. Shelf life of the hardener is approximately 12-18 months.

## SAFETY

Prepare a covered surface to work on to prevent floors and other surfaces from staining. Wear protective vinyl gloves. Avoid contact to skin, eyes and clothing.

## REPAIR STEP I

Clean the furniture piece with a damp cloth and mild detergent, allow to fully dry and proceed to mixing the rubber components.

## REPAIR STEP II

Mix the two components ratio **1:5 (one part hardener five parts coloured rubber)**. Mix them thoroughly and apply to affected area with a brush. Let it dry for approximately 5 minutes and continue adding layers to match the material thickness of rest of the piece.

## REPAIR STEP III

Set aside and allow to dry for 24hours. No extra treatments are necessary.

## IMPORTANT

Claims resulting from damages not immediately treated with JSPR repair kit and over all poor maintenance will not be taken in consideration.
