Jasper van Grootel, 2009

The modular system 'Cubics' consists of differently sized cubic boxes with fronts covered in a range of different materials, colours, and designs. This allows for unlimited variation and possibilities, so you can create your own ideal cabinet using your favourite combinations. You can choose from 16 different sizes of boxes, 3 ways to open them, 10 different materials and endless colour combinations! The system can serve as a wall-closet, a room divider or you can build it in a corner. The base can be a custom-size pedestal or a plinth. Special designer fronts are also available, for example in collaboration with Michiel van der Kley. JSPR will be continuously expanding the range of materials. Keep yourself updated by visiting our website; www.studiojspr.nl
