

Jasper van Grootel

Nature brings us a lot of materials and shapes to make ourselves feel comfortable at home. These unique shaped treetrunk cabinets are made from a solid mahogany tree trunk, straight from the woods. Only the outer piece of the trunk is used and fixated together. The inner piece of the trunk will be re-used to make other furniture objects.

Finally the cabinet is covered with a coating of hard matt rubber which still shows the original surface of the tree. The trunk is suited with cast aluminium supports that are made to fit each trunk individually. They are available in two sizes; 1.2m with two doors, or 1.8m with three doors.
