

1.

Carefully unpack the light fixture.

NOTE: The fixture is not suitable for use in moist environments such as bathrooms. Please get in touch with us for possible solutions in such areas.

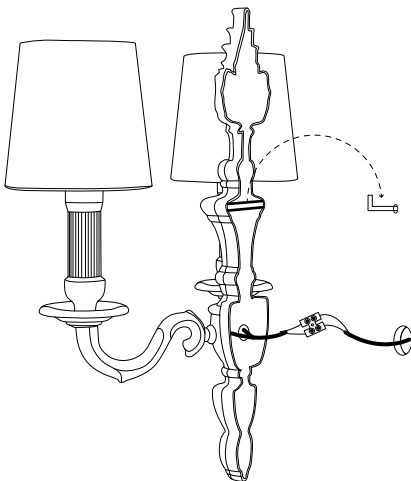

2.

Mark and drill hole for L shaped hook (hook and dowel by client). Use the approximate measurement from the light fixture back.

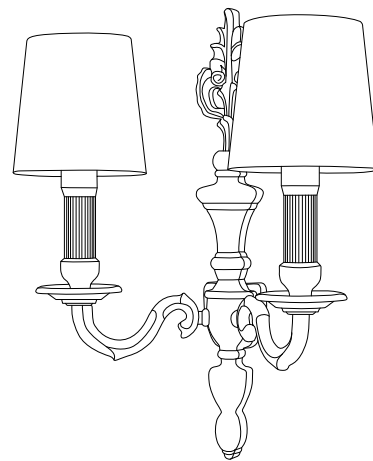

NOTE: Use hooks and dowels suitable for your wall material.

3.

Connect the lamps electricity wire to the house wire using a connection block. Hang the light fixture on the hook and tuck away any visible cables in the fixture.

4.

The light fixture is ready to use.
