Jasper van Groote

The Pad series are designed to create an abstract landscape of seatings. Comfort and simplicity are wrapped in a basic but effective design. The items stimulate the opportunity to bring nature inside; nature will melt into your interior.

The application of soft squared cushions, available in six carefully selected colour combinations and fabric qualities, make them fit in every kind of home decorations. The different textiles combined with the soft rubber coating of the base, make the benches comfortable and suitable in every environment.
