Jasper van Grootel

The Beaudine lighting collection is inspired by marine life. Each fixture consists of different, wave shaped petals forming an abstract mantle around a luminous pearl. Each light is handcrafted from lightweight, anodized aluminum and accompanied by a dimmable LED bulb.

This collection is ideal to create dynamic landscapes by combining all three designs in both private and public settings. While choosing from three different models and five different anodized colors you can already hear the gentle roar of ocean waves.

Accessories such as ceiling roses, drivers, dimmers etc. are available on request.
