

1.

Carefully unpack the wall sconce and the included parts.

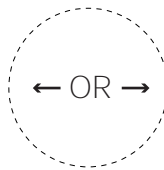

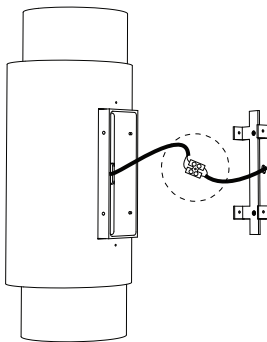

! Assembly and installation should be carried out by a professional.

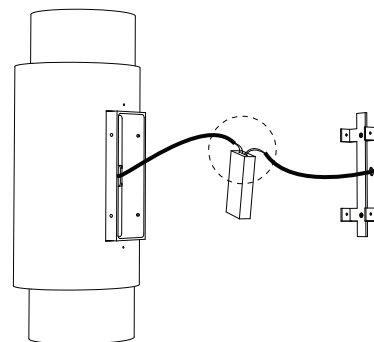

2.

Mark and drill holes in the wall near the house electricity cable. Use screws and dowels to fasten the wall bracket.

without dimmer

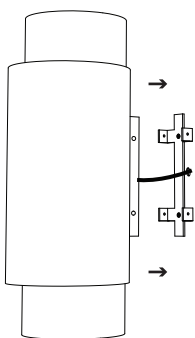

with dimmer

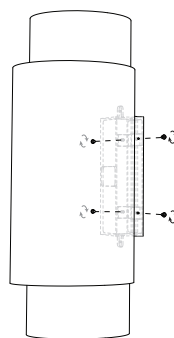

3.

Installation option with or without dimmer unit. JSPR provides an option of purchasing dimmers for the Union series that fit within the wall box. Use splicing connectors for direct connection. In the case of using a dimmer module follow the included instructions of the dimmer.

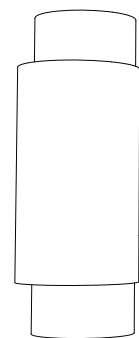

4.

Tuck any excess cable (and dimmer if used) into the wall box and slide it over the wall bracket.

5.

Fasten the fixture to the wall bracket by screwing in the provided screws.

6.

The fixture is ready.
