Jasper van Grootel

The Pillar collection owes its name to the inverted, ribbed glass, which reminds us of the iconic Roman pillars. Each Pillar lighting fixture is built around a Crystal glass bar, and finished with brushed aluminum parts that are available in a range of seven luxurious colours.

The combination of the Crystal glass with the brushed aluminum leads to a collection of beautiful lighting fixtures with a very high decorative appearance that really catches the eye. The Pillar collection spreads a soft light that makes any interior feel warm and inviting. We have incorporated the latest technology in this collection, combining modern lighting solutions and high end metalwork.

The Pillar collection consists of a wide range of light fixtures. Two suspended lights, a wall light, table light and two floor lights offering wide application opportunities for both private and public interiors.

Handcrafted in The Netherlands.
