Jasper van Grootel

The Jewels by JSPR create beautiful landscapes of sparkling light or even star filled skies. The Jewels are made out of anodized aluminum and combined with the retro LED lightbulbs, that sparkle like little gems, the fixture is chic yet playful and decorates the whole room. Each individual pendant varies in length from the other.

Available in seven anodized colors (black, silver, champagne, gold, bronze, pink and green), this delicate lighting fixture will truly be a piece of jewelry in both hospitality and domestic projects; stores and windows, above tables in dining rooms and restaurants as well as in foyers and lobbies.
